

Z-200

Z-200-H

Connection base

High connection base

Description

Connection base for all Detnov's ranges of conventional and addressable detectors.

This base has 4 stainless and metallic contact trips and has been designed to be a low-profile device. It is made of injected white ABS plastic and is equipped with an anti-theft system which lets you block the detector head. A tool is needed to extract the detector once it is blocked.

The Z-200 base supports an optional high profile accessory: STD-200.

Black color model available: Z-200-B, Z-200-H-B and STD-200-B.

Relay output model for conventional detectors: Z-200-R

Features

- Base compatible with all Detnov's detectors
- Compensates irregular surfaces
- Connection for a remote indicator
- Available in black color
